

# MOSS CLEANER

## concentrate

|   |   |
|---|---|
| Application:                            | Concentrate for cleaning moss, algae, lichen from concrete, pavement, granite and stone surfaces, all types of roofs, wooden facades and fences. Moss Cleaner concentrate not only cleans surfaces, but also provides protection against moss, algae and lichen, helping to keep your residential, commercial or industrial property clean and attractive. Moss Cleaner concentrate is biodegradable in contact with organic materials. It does not contain chlorine bleach, caustic salts, acids or phosphates.  |
| Properties:                             | <ul style="list-style-type: none"><li>• Easy to use;</li><li>• Biodegradable;</li><li>• Transparent color;</li><li>• Safe and effective for both residential and commercial use</li></ul>   |
| Usage:                                  | <ul style="list-style-type: none"><li>• Clear the surface of leaves and other dirt to ensure maximum penetration of Moss Cleaner's active ingredients into the green mass and their effect.</li><li>• When creating the working solution, dilute the concentrate with water in the appropriate concentration depending on the surface to be treated. The product is foamy, so let the working solution stand for 5 - 10 minutes.</li><li>• Using the spraying method, the composition is applied to the surface until it is evenly moisturized.</li><li>• Use in dry conditions.</li><li>• After processing, while the surface has not yet dried (usually 1-2 hours), make sure that children and pets do not come into direct contact with the product.</li><li>• When processing, we recommend using protective equipment (gloves, goggles).</li><li>• The optimal temperature for processing is from +12 to +25 degrees. Do not use at temperatures below +5 °C.</li></ul> |
| Exposure:                               | <ul style="list-style-type: none"><li>• On surfaces affected by algae, Moss Cleaner takes effect within a few days;</li><li>• After treatment, the moss turns brown within a few days. It takes a couple of weeks for them to break down completely. Mechanical cleaning with a brush can be done to speed up this process. The exposure time of the product depends on the thickness of the moss.</li><li>• Lichens may require two treatments.</li></ul>  |
| Consumption for mineral surfaces:       | <ul style="list-style-type: none"><li>• Dilute with water 1:5<br/>18 – 30 m<sup>2</sup> / 1 L<br/>90 – 180 m<sup>2</sup> / 5 L</li></ul>  |
| Consumption for wooden surfaces, roofs: | <ul style="list-style-type: none"><li>• Dilute with water 1:4<br/>15 – 20 m<sup>2</sup> / 1 L<br/>75 – 100 m<sup>2</sup> / 5 L</li></ul>  |
| Storage:                                | Protect from direct sunlight and freezing. Validity period 2 years from the date of manufacture.  |
