

StoneFix

For fixing decorative rocks and mulch

Application:	“StoneFix” is a high quality product specially developed for fixing decorative garden rocks and mulch. It ensures excellent adhesion between the materials, bonding effectively and making it ideal for both home gardens and flower beds. “StoneFix” is environmentally and animal friendly, as it is a water-based solution, which does not contain harmful chemicals and is safe to use in the garden. “StoneFix” is not suitable for home driveways or footpaths as it is not designed to withstand mechanical loads.
Properties:	• When dry, it becomes transparent, with a slight sheen • pH 7.0 – 8.0 • No distinct odour • UV stable • Easy to use
Usage:	• Stonefix requires dry weather conditions – not lower than +10 °C. • First, clean the stone or gravel from dirt and leaves. Make sure the material is dry; • Apply using a sprayer or watering can; • Spray the product in a single layer about 30 cm from the surface. • Allow the coated surface to dry for 24 hours.
Safety measures:	• Personal protective equipment: Safety goggles and gloves • Inhalation: Under normal conditions of use and storage, the product does not pose an inhalation hazard. If the exposed person feels unwell, he/she should be taken out of the exposure area into fresh air. Ensure they remain calm. If symptoms persist, consult a medical doctor. • Skin contact: Take off contaminated clothing and footwear. Wash contaminated skin thoroughly with plenty of soap and water. Consult a medical doctor if skin irritation occurs. • Eye contact: Rinse the eyes thoroughly with plenty of water for at least 15 minutes, while lifting the eyelids. Remove contact lenses, if they are present and it is easy to do so. Consult a medical doctor if irritation occurs. • Ingestion: Consult a medical doctor.
Coverage:	1 – 2 m ² /L.
Storage:	Store in a cool, dry and well-ventilated place. Protect from freezing and direct sunlight.
