

StoneProtect

Stone and Concrete Impregnator

Usage:	The product is intended for surface treatment both indoors and outdoors. It protects mineral surfaces from moisture, dirt accumulation, and weather effects while preserving their natural appearance. Suitable for porous mineral surfaces: concrete, aerated concrete, facing stone, plaster surfaces, etc. (can be used for decorative stones and gravel, garden paths, paving, stone edges, sculptures, pots, and other outdoor elements).
Properties:	• pH 7,0 – 8,0 • Density 0,99 - 1,00 g/cm³ • Easy to apply • Penetrates deeply into stone pores and provides water-repellent properties
Instruction for use:	• The surface must be completely dry and clean; • Before application, remove dust, dirt, grease, moss, and other contaminants; • Surfaces with moss or lichens are recommended to clean with VP Moss Cleaner products; areas affected by mold should be treated with VP Fungi before further application; • Surrounding plants, grass, and other sensitive surfaces should be covered.
Safety measures:	• Personal protective equipment: safety goggles and gloves • Inhalation: Move the affected person to fresh air. Keep warm and allow rest. If breathing is difficult, provide oxygen or artificial respiration. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek medical attention immediately. • Skin contact: Remove contaminated clothing and footwear. Wash contaminated skin thoroughly with plenty of water and soap. If skin irritation occurs, consult a doctor. • Eye contact: Rinse eyes thoroughly with plenty of water for at least 15 minutes, keeping eyelids open. Remove contact lenses if present and easy to do. If irritation persists, consult a doctor. • Indestion: Do not induce vomiting. Seek medical attention immediately.
Consumption:	3 – 6 m ² /L.
Storage:	Store in sealed container at temperatures of + 5°C to + 30°C. Validity term is two years from the date of manufacture. See the date of manufacture on the package.
